

CLAIMS

1. A tablet which comprises a section 1 and a section 2 wherein the section 2 comprises a higher level of pectate lyase than section 1.
2. A tablet according to claim 1 wherein the tensile strength of section 1 is larger, preferably at least 2% larger, more preferably 5%, even more preferably 10% and most preferably 30%, than the tensile strength of section 2.
3. A tablet according to claims 1-2 wherein section 2 has a larger exposed surface than section 1.
4. A tablet according to claims 1-3 wherein section 2 has an exposed surface equal to the exposed surface of the tablet.
5. A tablet according to claims 1-4 wherein section 2 is applied by a coating process.
6. A detergent tablet according to any of the preceding claims wherein section 1 is a slow dissolving section and section 2 is a rapid dissolving section.
7. A tablet detergent according to any of the preceding claims wherein said pectate lyase is comprised at a level of from 0.0001% to 2%, more preferably from 0.0005% to 0.1%, most preferred from 0.001% to 0.02% pure enzyme by weight of the tablet.
8. A detergent tablet according to any of the preceding claims wherein more than 70%, preferably more than 85%, more preferably more than 95% of the total amount of the pectate lyase enzyme, is comprised in section 2 of the detergent tablet.
9. A tablet detergent according to any of the preceding claims wherein said section 2 comprises a buffering material.

10. A method of cleaning a fabric or a dishware with a tablet according to any of the preceding claims.
